

Exporting a TestGen QTI File into a Canvas Course

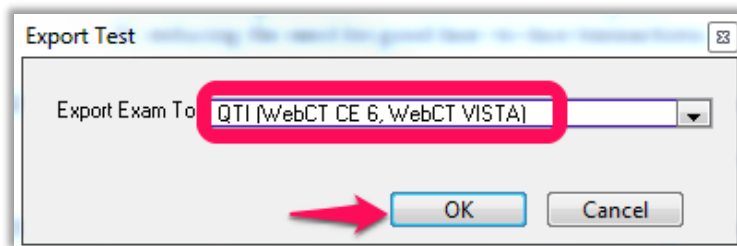

You can use TestGen to create assessments and import them into your Canvas courses. This handout will cover how to export a QTI file from these programs and import them into Canvas. This handout will **not** cover how to build an exam with these programs.

It is important to note that files imported in this way may have strange point values. To correct this issue we recommend [creating a question group in Canvas](#). This will allow instructors to add a default value to all questions.

1. To export a QTI file from TestGen, select **Export** from the File menu.

2. In the new dialogue box, select **QTI (WebCT Vista)** then click **OK**.

3. Name the exam and click **Save**.

4. To import the file into Canvas see [Importing a QTI File into a Canvas Course](#).

Importing a QTI File into a Canvas Course

1. Go to your course settings to import a QTI file.

2. Select **Import Content into this Course**.

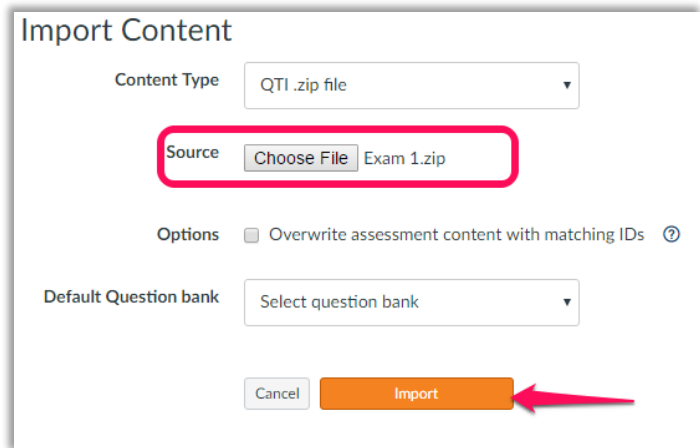

3. On the new page, **select QTI .zip file** from the drop down menu.

4. Click **Choose File** and browse for the QTI file previously exported.

5. For this handout we will leave the options and default question bank blank.

6. Click the **Import** button.

7. Once the file finishes *“running”*, the assessment will be available in your *Quizzes* tab.

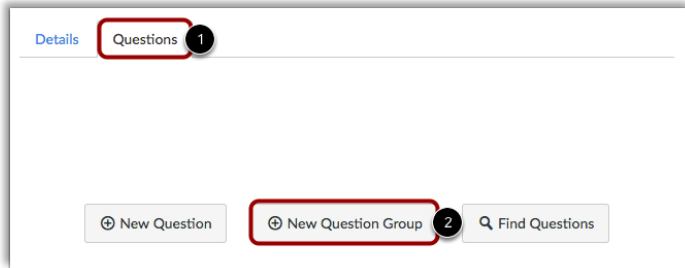

8. Preview your assessment. If your points per question looks strange, try [creating a new quiz with a question group](#).

Creating Question Groups

You can create a quiz using a question group. Question groups allow you to place multiple questions within a group for students to answer. You can choose the number of questions that should be answered from the group and how many points to assign each question. Creating a question group randomizes questions within a quiz.

1. Click the **Questions** tab (1). Click the **New Question Group** button (2).

2. Give your question group a name (1).

3. Regardless of the question group name, students always see quiz questions in numerical order (i.e. Question 1, Question 2).

4. Decide how many questions you want Canvas to randomly select from the group (2) and the number of points assigned to each question (3).

5. If you want to link a question bank to the question group, click the **Link to a Question Bank** link.

6. Select the question bank you want to use.

7. Save the changes to your quiz.
8. Preview your quiz.
