

Instructions to access the TSC Virtual Private Network (VPN)

- 1) If you already have a TSC laptop, you can launch Dell SonicWall NetExtender and login with your TSC username and password.

- 2) If you have a TSC computer and don't have the NetExtender VPN client loaded on that computer, please contact the HelpDesk (helpdesk@tsc.edu, 956-295-3800) so that our technicians can remote install the client on your TSC computer as you likely do not have administrative rights on the machine.
- 3) If you have a personal computer, you should have admin rights and be able to download the VPN client using the link below. Please choose the NetExtender Client.
