

Plumbing Technician Program Certificate of Completion

Texas Southmost College
Workforce Training and Continuing Education

This course will provide students with the skills to identify and select common plumbing materials and equipment, perform mathematical calculations applicable to the plumbing trade, and operate hand and power tools safely. The purpose of this course is to provide students with the real-world industry skills necessary to become an entry-level Plumbing Technician.

This 160-hour program prepares an individual to understand and perform the following:

- Blueprint Reading
- Mathematics
- Safety
- Codes & Standards
- Plumbing Installation
- Plumbing fixtures
- OSHA 10
- Proper Tool Care and Safety

Students will become familiar with design and layout, assembly and installation of various plumbing systems, reading blue prints, and general safety.
