

## Computer Science Associate of Science

Texas Southmost College  
Division of Science, Technology, Engineering & Mathematics

The Associate of Science in Computer Science (AS.COSC) degree prepares professionals in the areas of software development. This degree is designed to lead students to transfer into a four-year university and obtain a Bachelor of Science in Computer Science or a Master of Science in Computer Science.

This degree can prepare students for numerous entry-level jobs in the fields of computers and information technology. Students typically meet minimum requirements for many web development, support, and programming careers. It is strongly recommended, however, to pursue the professional four-year degree as soon as the students complete the associate degree.
