

A certificate in Structural Welding prepares students for entry-level positions as a welder, sheet-metal worker, or fabricator by providing hands-on training introducing the best practices basic welding. Upon completion of this certificate, the student should be able to obtain careers in the manufacturing industry.

Recommended Course Sequence

Program Courses	Credits	Suggested Semester
WLDG 1313* Introduction to Blueprint Reading for Welders	3	Fall/Year 1
WLDG 1407* Introduction to Welding Using Multiple Processes	4	Fall/Year 1
WLDG 1428* Introduction to Shielded Metal Arc Welding	4	Fall/Year 1
WLDG 1417* Introduction to Layout and Fabrication	4	Fall/Year 1
Total Credit Hours for Graduation	15	

*Grade of “C” or better is required for graduation.

<p>Program Student Learning Outcomes (PSLO) are statements that specify what students will know, be able to do or be able to demonstrate when they have completed the program.</p> <ol style="list-style-type: none"> 1. Interpret and apply welding blueprints, including the understanding of symbols, measurements, and specifications, to guide welding projects. 2. Develop basic principles for welding tasks using multiple processes. 3. Apply welding techniques using the Shielded Metal Arc Welding (SMAW). 4. Differentiate between layout and fabrication, including the ability to measure, mark, cut, and assemble materials according to design specifications and project requirements.
