

Forklift Certification Institutional Certificate of Completion

IACE1.FORK

Texas Southmost College
Workforce Training and Continuing Education

Students will learn to safely operate a forklift per the Occupational Safety and Health Administration (OSHA) safety standards. Students will also learn to manage the hydraulic lift on the forklift and perform basic loading, balancing, lifting, and carrying tasks of materials. They will learn about refueling or recharging procedures, and how to park the forklift properly. Upon completion of the course, students will have the opportunity to earn an Institutional certificate of completion and a Forklift Operator license

COURSES	Hours
CNSE 1003 Forklift Operator Certification	16
