

Patient Care Technician Occupational Skills Award

OSA1.PCT
IACE1.PCT
2024-2025

Texas Southmost College
Workforce Training and Continuing Education

This program will provide the knowledge to establish a safe and supportive environment for patients. Students will learn ethical and legal standards of infection control, patient care, CPR, EKG, and phlebotomy practices, and the physical skills needed to assist patients with all daily activities. This program will help graduates secure employment in the health care industry. Upon successful completion of the program, students can take the National Health Career Association certification exam to become a certified Patient Care Technician and EKG Technician.
