

Phlebotomy Technician Occupational Skills Award

IACE1.PLAB

OSA1.PLAB

2024-2025

Texas Southmost College
Workforce Training and Continuing Education

Students will learn the skills needed to become a certified Phlebotomist. Phlebotomists are responsible for collecting and tagging specimens exactly as outlined in each medical requisition. Students will learn to properly package each specimen and ensure that every specimen is delivered to the laboratory on time. The program prepares the student for the National Healthcare Association (NHA) national exam. This program will help graduates secure employment in all kinds of medical facilities, from hospitals to private laboratories. Upon completion of both courses, a student will earn an Occupational Skills Award and may enter the workforce as a phlebotomist.

COURSES	Hours
PLAB 1023 Phlebotomy	96
